

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of claims:**

1. (Currently amended) A medicine pack[[,]] comprising:  
a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, and the protective case being able to be unfolded or opened out,  
and ~~optionally~~ an outer package for receiving the blister units, wherein the outer package has resilient tabs in the inside as a means for retention of the pack content.
2. (Canceled)
3. (Currently amended) The medicine pack as claimed in claim [[2]] 1, wherein the outer package is composed of a plurality of individual parts not connected to one another.
4. (Currently amended) The medicine pack as claimed in claim 3, wherein the outer package ~~is made up of~~ comprises an open base box and a clamp sleeve.
5. (Currently amended) The medicine pack as claimed in claim [[2]] 1, wherein the

outer package ~~is equipped with~~ comprises a device for reclosing the outer package.

6. (Currently amended) The medicine pack as claimed in claim ~~[[2]]~~ 1, wherein the outer package has a device for reclosing the outer package, wherein said device for reclosing the outer package is connected to the outer package in such a way that said device can be separated from the rest of the outer package.

7. (Currently amended) The medicine pack as claimed in claim ~~[[2]]~~ 1, wherein the outer package has a device for reclosing the outer package, wherein said device for reclosing the outer package has a hinged lid, a hinged sleeve or a sealing strap.

8 - 9. (Canceled)

10. (Currently amended) The medicine pack as claimed in claim ~~[[2]]~~ 1, wherein the outer package has a base box with resilient tabs.

11. (Previously presented) The medicine pack as claimed in claim 5, wherein the outer package has a base box with resilient tabs.

12. (Presently presented) The medicine pack as claimed in claim 1, wherein the blister units are connected detachably to one another and can be folded together so that, when folded together, the individual blister units come to be coplanar with respect to one another.

13. (Previously presented) The medicine pack as claimed in claim 11, wherein the medicine pack has three or six blister units, in each case with five blister cavities, or wherein the medicine pack has two or four blister units, in each case with seven blister cavities.

14. (Previously presented) The medicine pack as claimed in claim 1, wherein a transparent film encloses the entire medicine pack.

15. (Original) A medicine pack comprising

a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, the protective case being able to be unfolded or opened out,

and also an outer package for receiving the blister units, the outer package having a device for reclosing the outer package and a film as wrapper.

16. (Original) A medicine pack comprising

a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, the protective case being able to be unfolded or opened out,

and also an outer package for receiving the blister units, the outer package having a base box with resilient tabs and a film as wrapper.

17. (Original) A medicine pack comprising

a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, the protective case being able to be unfolded or opened out,

and also an outer package for receiving the blister units, the outer package having a base box with resilient tabs, a device for reclosing the outer package, and a film as wrapper.

18. (Original) A medicine pack comprising

a plurality of blister units, said blister units each having a protective case, with a blister strip located therein, the blister strip being fixedly connected to the protective case, and the protective case being able to be unfolded or opened out,

and also an outer package for receiving the blister units, the outer package having a base box with resilient tabs, a device for reclosing the outer package, which can be detached from the rest of the outer package, and a film as wrapper.

19. (Previously presented) The medicine pack as claimed in claim 1, containing a leaflet with the patient information and/or directions for use.
